

RECORD OF CONTINUITY OF BRAZER QUALIFICATION

359 Windy Pine Drive, Lake Wylie SC 29710 office (803) 746-5562 fax (803)753-9799

It is the Credentialed Installer's responsibility to keep a brazing record. This record is proof that you meet the qualifications under provision QB-322 (a) of the ASME Section IX Boiler and Pressure Vessel Code. This provision requires that a Medical Gas Installer must braze continually, at least once every six months, to meet the performance qualification of the ASSE 6010 Medical Gas Installer Credential. If this record is not kept and you cannot prove continuity of brazing qualification then your credential is no longer valid regardless of the expiration date. You would then have to plan to renew for qualification of the performance qualification under the instruction of an ASSE 6050 Medical Gas Instructor.

Installer Name (Print)

Installer Home Address

City, State, Zip Code

Date of Initial Credential or Renewal

Last Verified Braze Date:

Next Braze must be by:

This Individual has successfully brazed on the following dates in compliance with the requirements of provision QB-322 (a) of the ASME Section IX Boiler and Pressure Vessel Code.

_____ **Date of Braze** _____ **Installer's Signature**
